

Lifting tape 'multi'

FOL 501MT

- Masking tape with two different sized plastic strips for masking various areas of the vehicle.
- The combination of two plastic strips makes it possible to use one tape for three different applications.
Simply place one, two or the two strips folded together between rubber and panel and then pull away the rubber from the panel by attaching the tape to the wind screen.
- The tape and strips are perforated every 42mm, so they can be torn by hand.
- Always tear from the plastic side to the tape side.
