

## Lead & tin replacer 1,5 kg + hardener

### DEB 12

- Alsi 12 is a cold metal that can be used as an alternative to fluid tin
- Replaces Pb – Sn
- Exceptional hardness
- Flaky composition lends the product a very high degree of flexibility
- Once fully cured, it resists hydrocarbons (gasoline, diesel fuel) and some acids (battery acid)
- Reshaping of rough edges, wheel casings, doors and roof
- Perfect for repairing light alloy wheels
- The ultimate product for classic car restoration
- Max. heat resistance

Colour: steel grey  
Hardener: BPO red  
Mixing ratio in %: 2
