

Matting compound

POL 70

Matting compound is a composition of liquid chemicals and abrasives intended for surface preparation prior to the blending and painting of new panels. It is suited for any type of paint including waterborne. To be used in combination with non-woven cloth, for instance the SOF 20 or SBR 20.

- For all types of paints
- Gives a matt surface
- Easy to apply
- Easy to remove without traces
- Can be used dry or combined with degreaser DGR
- Water-based product
