

## SAS – Finixa safety boot S3

### Product description:

Trendy, comfortable safety-sneaker.  
Lightweight and metal-free protection.

### Safety Standard: EN ISO 20345:2011 SRC

#### **Protective toecap in composite EN 12568:2010**

- Impact resistance > 200 J
- Compression resistance > 15 kN
- Advantage: lightweight

#### **Flexible composite antiperforation protection**

- Penetratie resistance > 1100 N
- Flexible anti perforation sole, made of different layers high-tech textile yarns (such as LNZ).
- Advantage: more flexibility, better ergonomics

#### **Size:**

EU      36 - 48  
UK      3 - 13

#### **Upper:**

- Flexible and water resistant Dry milled Leather
- Soft Padded Ankle
- Nice padded Tongue with Dry milled Leather.
- Lacing with 6 rows solid o-rings.

#### **Lining:**

- Abrasive and absorbent 1956 textile.

#### **Inlay sole:**

- anatomically shaped
- extra support on arch
- shock absorption system in foamed PU in the heel area
- excellent absorption capacity
- antibacterial and odor-eliminating
- antistatic

#### **Outsole:**

##### **PU/PU outsole offers excellent absorption and an optimum stability**

- lightweight, soft PU comfort inner layer
- very abrasion resistant PU outsole, appropriate for both rough and slippery surfaces
- white color: does not mark on floors

##### **Meets the SRC slip resistant standard (EN 13287 test method)**

- SRA – meets the slip resistance requirements on ceramic tiles
- SRB – meets the slip resistance requirements on steel plates
- SRC – the shoes fulfill the requirements of both SRA and SRB

**Excellent resistance against oils, acids, fat.**

**Antistatic (electrical resistance between 100 kΩ and 1000 MΩ).**
