

TECHNICAL SHEET – BTC 80 Finixa H²O gun shampoo 20l

Description

BTC 80 is a shampoo to be used to clean spray gun in combination with water based paints. BTC 80 is cost affective and environmental friendly as cleaning cycles and product consumption will be reduced up to 50%.

BTC 80 can be coagulated repeatedly in combination with the Finixa coagulation set AGC 10 and AEC 90 coagulation powder. The coagulation process will significantly reduce the costs of waste disposal as 20L of contaminated liquid will be converted into 2-3 kg solid material. On top, the coagulated liquid can be regenerated using the Finixa BTC 001 and reused again as a 100% shampoo.

Characteristics

Time and cost efficient.
Environmentally friendly.
Up to 200 cleaning cycles for every 20l

Reusable by process of coagulation and regenerating resulting in drastically waste reduction from 20L contaminated liquid into 2-3kg solid material recuperated by official waste disposer.

Can be used in combination with all automatic spray gun cleaners. Or, if necessary, in combination with a manual spray gun cleaner.

How to use:

To be used in the same way as the cleaning process done with water.
Never dilute the product!

Storage and shelf life

Product needs to be protected from freezing.
Shelf life: 2 years

The above information is given in good faith, but the user should assure himself that the performance of the product is sufficient for his application. The quoted values are average and should not be taken as maximum or minimum values for specific purposes. Chemicar Europe cannot be held responsible for product failure unless full testing has been carried out. The client has to decide on the products suitability for their own applications.
