

TECHNICAL SHEET

CBC – Cabin Clean

Properties

A liquid especially developed for cleaning cabin floors and tile walls. Cabin Clean does not contain methylene chloride and is therefore environmentally friendly. Cabin Clean can be used to eliminate paint layers or paint overspray.

In general Cabin Clean is a slow working paint remover that has to be applied in several layers in case of a thicker paint layer. Cabin Clean has no influence on the most plastics, we recommend to test always on a small surface first.

Advantages

No VOS
Biodegradable
Low consumption

Application

Apply with a brush and wait for a few minutes, then rinse with water. If necessary, repeat the previous step. Tools can be cleaned with water.

Attention!

Cabin Clean can leave marks (circles) on aluminium and stainless steel (corrosion)

Personal protection

Wear protective gloves and face protection during application.
Wear also a mask during spraying.

The above information is given in good faith, but the user should assure himself that the performance of the product is sufficient for his application. The quoted values are average and should not be taken as maximum or minimum values for specific purposes. Chemicar Europe cannot be held responsible for product failure unless full testing has been carried out. The client has to decide on the products suitability for their own applications.
