

WATER-BASED SILICONE REMOVER AND SURFACE DEGREASER

The versatility of our water-based degreaser is remarkable as it effectively eliminates dirt, dust, swarf, and grease from various surfaces including old paint layers, primers, metal, and plastic. Additionally, it serves as an excellent substitute not just for other water-based degreasers, but also for solvent-based silicone removers. Moreover, our product offers exceptional performance, serving not only as the ultimate step in degreasing for water-based lacquers.

► Eliminates salt and soap rests.

By using 2 cloths, the water-based degreaser removes all dirt from the surface without leaving any traces.

► Can be used without mask or gloves.

Next to being nature friendly, the water-based degreaser can be used without any protective gear.

► Antistatic action on the surface.

Compared to solvent-based degreasers, the water-based degreaser completely nullifies any static action on the surface.

► Does not affect rubber or plastic.

The water-based degreaser does not affect rubber or plastic, while solvent-based degreasers almost always cause damage to the surface.
