

# FREQUENTLY ASKED QUESTIONS

**NEW**

## **MASKING TAPE CORAL 110°**

**MST 419-450**

Masking tape with high flexibility

### **1 WHAT SIZE TAPE SHOULD I USE, DOES THE WIDTH MATTER?**

Although the width of the tape has no influence on its performance it can be preferable to use a more narrow tape, like 19mm, in more complex applications like mirrors, antennas, head & back lights .....

The general rule is : the shorter the bend the narrower the tape.

Afterwards, masking with paper or foil with a wider tape can be more practical.

### **2 WILL THE MST 4XX STICK TO RUBBERS?**

Yes, the good adhesion and high flexibility of the MST 4xx makes it ideal to mask rubbers. Always make sure the surface is properly cleaned before applying the masking tape.

### **3 CAN I USE MST 4XX FOR BOTH WATER- & SOLVENT-BASED BASE COATINGS?**

Yes, the MST 4xx masking tape is made out of saturated crepe paper to prevent water- or solvent-based coatings from penetrating.

# FREQUENTLY ASKED QUESTIONS

## 4 CAN I USE MST 4XX WITH INFRARED DRYING?

Yes, the MST 4xx masking tape can be used for both spray booth baking as IR curing in the body shop. Consult the coatings TDS for specific curing instructions.

## 5 WILL MST 4 XX LEAVE A STAIN OR RESIDUE IF/WHEN REMOVED?

The MST 4xx masking tape can be easily and cleanly removed without leaving any stains or residue. Stains or residue can occur when drying with excessive temperature or removing the tape after a long period of time. Please consult the TDS for more info.

## 6 WHAT IS THE SHELF LIFE OF MASKING TAPE?

The recommended shelf life for masking tapes is one year.
